Examining Climate Change Projections

Exercise: www.climatewizard.org
Examining Climate Change Projections

Exercise www.climatewizard.org

Assess the following for your area of interest:

- Mean T & P changes
- Spread of the changes between models, are they large or low? (ensemble high and low)
- Is there much difference between the different emissions scenarios?
- What season is influenced most? (spring, summer, autumn, winter)
- Is there much variation over your area of interest?
