

Recommendations of this workshop and future prospects

A-Addressed the member countries

1. Develop systems, laws and legislations necessary for the application of new international classifications (economic and social);
2. Encourage the establishment of specialized units for the classifications and manuals in each member country to follow up the implementation of the recommendations among the relevant government authorities;
3. Promote the cooperation among member countries in the field of new international classifications such as the sharing the Egypt experience in the application of ISIC rev.4;
4. Urge member countries to establish a timetable for the application of new international classifications ISIC rev.4;
5. Provide more training for staff in the statistical offices and related ministries;

B-Addressed to the United Nations

1. Convene workshops and specialized training to assist in the implementation of related economic classifications;
2. Underscore, to the concerned United Nations agency, to expedite the release of the official Arabic version of the ISIC classification with the related manual, while making use of the available draft prepared by Palestine and Egypt;
3. Provide the electronic versions of the international classifications such ISIC and CPC which are made available to the United Nations Statistics Division;
